

Universal Module - UM-S

S3

The "Universal Module-S" can be used as a universal mount for a wide range of tools.

High speed, stability and proven technology – these qualities are hallmarks of the Universal Module-S.

The UM-S can be used as a mount for a wide range of Zünd tools, allowing you to adapt the function of the S3 cutter to meet current requirements.

For each application a new tool can be inserted for operation with little handwork.

Other features:

- The bayonet catch enables swift tool changing, with the tool always fixed in the turning centre.

- The module can be operated in print mode and in position mode.

- A torque support for driven tools is integrated.

- The UM-S can be operated with a glide element to process wavy materials. The glide element is available as an option.

Details:

Maximum load: 5 kg
Stroke: 33 mm (material clearance S3 max. 30 mm)
Tool holder: 40 mm
Pressure mode: 2-10 kg

Benefits as a glance:
